## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 14-16, are rejected under 35 U.S.C. 102(b) as being anticipated by

The JP 06060422 reference discloses an optical recording material and optical recording substrate having the characteristics and parameters, i.e. laser light and wavelength within the transmittance ranges as claimed by applicants. Note abstract and claims.

Further, with regard to claims 14-16, 19 note the reference discloses that the disc comprises a polymer as a polymethyl methacrylic resin which falls with the generic polymer compositions as claimed.

In view of the above, there appears to be no significant difference between the reference(s) and that which is claimed by applicant(s). Any differences not specifically mentioned appear to be conventional. Consequently, the claimed invention cannot be deemed as novel and accordingly is unpatentable.

## Claim Objections

Claims 8-13,17-18, are objected to because of the following informalities: Claims are dependent upon rejected claims may be allowable if rewritten in independent form.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.
